NOTES

MANHOLE: Manhole No. 5 shall consist of a base or bottom as detailed hereon and other manhole components as detailed or specified on **SCD MH-1.2.**

In lieu of the tongue and groove junction between the riser and the base, the base may have a flat surface and the riser may have a square end set in a bed of mortar on the base.

OPENINGS: Openings for 42" [1050] and under inlet and outlet sewer pipes shall be prefabricated in the riser section unless the base is built to an elevation 2" [50] above the manhole top of the inlet and outlet pipes.

CONCRETE: Concrete for the bases may be Class C or meet the requirements of CMS 706.13. The bases may be precast or cast in place. If precast, the base on sewers 42" [1050] and under shall have sufficient steel reinforcement to permit shipping and placement without damage to the base. The base on sewers 48" [1200] and over shall be reinforced as shown.

STEPS: Steps shall comply with the requirements set forth on **SCD MH-1.1.**
